• First version of the model has been done!

   *Check if it is the right one…*

• Modeler runs well …but outputs (Quadphase, Inphase and Power) are constants!!

• Questions about the implementation of the BS and of Sidebands_gen

• Next step: Insertion of 40m Mach-Zehnder specifications
Mach-Zehnder package

Outputs:
BS1 and BS2 transmitted field
Data-out:
Quadphase, Inphase and Power signals
Detector and Beam-Splitter

Mzdetector.box

BS.box

Is this the right configuration for a BS?
